DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1637.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a method and kit to detect or identify a chemical species A to a substance containing DNA or RNA comprising using the chemical species which can recognize a base sequence of DNA. Classified in class 435, subclass 6/810.

Group II, claim(s) 20-21, drawn to a plate consisting of a plurality of wells comprising presence of a chemical species which can recognize a base sequence of DNA. Classified in class 435, subclass 288.3.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1637

Group I, claims 1-19 are drawn to a method and kit for detecting or identifying a chemical species which can recognize a base sequence of DNA, while Group II, claim 20-21 are drawn to a plate comprising a chemical species which can recognize a base sequence of DNA. Since the plate consisting a plurality of wells is apparatus which is different from the kit which can be used for DNA purification or performing the method as claimed. The plate is also different from the method in which the one is apparatus and the another is method. Thus they do not relate to a single general invention concept.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

4. Any inquiries concerning this communication or earlier communications from the examiner should be directed to Joyce Tung whose telephone number is (703) 305-7112. The examiner can normally be reached on Monday-Friday from 8:00 AM-4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached at (703) 308-1119 on Monday-Friday from 10:00 AM-6:00 PM.

Any inquiries of a general nature or relating to the status of this application should be directed to the Chemical/Matrix receptionist whose telephone number is (703) 308-0196.
